To

JOHN W. GRANT

and

THE RETIRING BOARD OF TRUSTEES,

We, the students of Georgia School of Technology officially dedicate this book.

The Georgia School of Technology from its beginning has been fortunate in its Trustees. The different men, appointed to this high position, have been marked by high character, business ability, and that far-seeing vision that always characterizes statesmanship. Merely to call their names proves this fact, and shows how much indebted the State is to these gentlemen for their guardianship. The list of those who served from the foundation until January 1, 1932, when the new Board of Regents superseded the Trustees of the various institutions is as follows:

N. E. HARRIS
O. S. PORTER
COLUMBUS HEARD
W. B. MILES
GEORGE W. PARROTT
N. P. PRATT
E. R. HODGSON, JR.
J. S. AKERS
GEORGE H. CARSWELL
L. W. ROBERT, JR.
E. R. BLACK
JOHN H. PORTER
G. M. STOUT
HARRISON HIGHTOWER
S. M. INMAN
E. R. HODGSON, SR.
D. N. SPEER
GEORGE WINSHIP
WALTER M. KELLEY
HAL G. NOWELL
GEORGE J. BALDWIN
JOHN W. GRANT
GEORGE G. CRAWFORD
FLOYD FURLOW
W. H. GLENN
FRANK FREEMAN

JOHN S. COHEN

JOHN W. GRANT

FOREWORD

IT IS HOPED, THAT WITH THE PASSING OF THE YEARS, THIS BOOK WILL BE AN EVER PRESENT REMINDER OF THE DAYS THAT THE READER SPENT UNDER THE ENVIRONMENT OF HIS ALMA MATER. UPON OPENING THIS VOLUME, IF THE READER CAN RECALL THE SCENES AS WE HAVE TRIED TO PORTRAY THEM, OUR EFFORTS WILL HAVE BEEN REWARDED.

CONTENTS

Book One COLLEGE

Book Two CLASSES

Book Three . . . PHOTOGRAVURE

Book Four FRATERNITIES

Book Five ATHLETICS

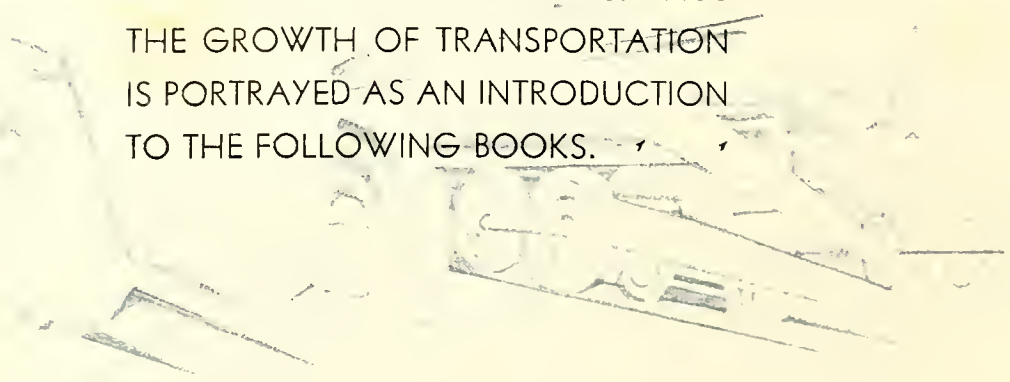

Book Six ACTIVITIES

Book Seven . . EVENING SCHOOL

Book Eight FEATURES

T H E M E

MOST APPROPRIATE IS A MECHANICAL THEME FOR A TECHNICAL INSTITUTION. IN PRESENTING THIS BOOK THE ART STAFF HAS INCORPORATED THE SIX FUNDAMENTAL PRINCIPLES OF MECHANICS IN THEIR SIMPLEST FORMS. PROBABLY THE GREATEST DEVELOPMENT IN THIS FIELD, TRANSPORTATION, HAS BEEN SELECTED BECAUSE IT DEPICTS THE TRUE SPIRIT OF MECHANICS AND TYPIFIES THE UNFOLDING OF NEW METHODS AS THE NEED ARISES. THUS THE GROWTH OF TRANSPORTATION IS PORTRAYED AS AN INTRODUCTION TO THE FOLLOWING BOOKS.

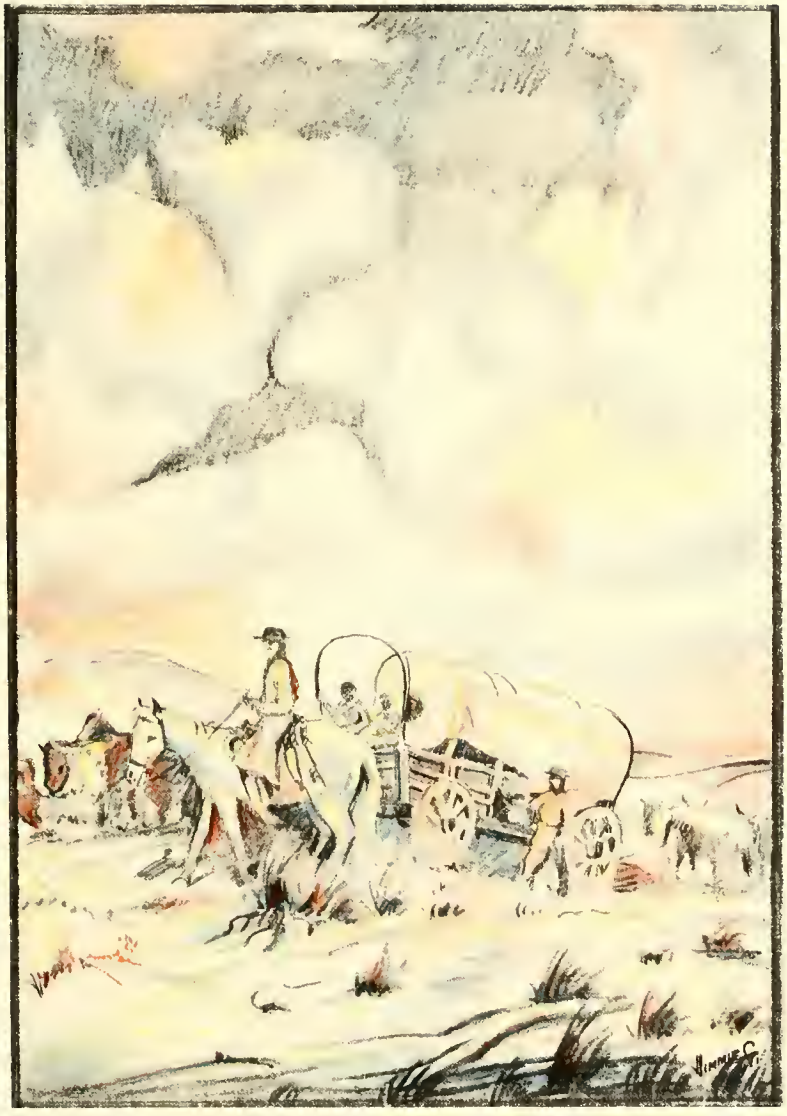

BOOK ONE

ADMINISTRATION

A MEMBER of our new State Board of Regents recently referred in terms of praise to the definite, purposeful aim and work of the students of the Georgia School of Technology. It is certainly true that there has been some uncertainty with regard to the curricula of other institutions, but none here. You, members of the class of 1932, have received careful and specific training for the work you propose to do in life. From Architecture to our newest department of Aeronautics, you have known what you want, and I believe that this same clear perception throughout the future will crown your labors with success and make your Alma Mater feel the same pride in you as in those forceful men who have gone from this institution in other years.

President Marion Luther Brittain

Dean William Vernon Skiles

REGISTRAR AND SECRETARY OF THE FACULTY

AS OFFICER of admissions, the Registrar passes on all applications and certificates of prospective students. His office receives and records in permanent form the scholastic standing of all students, and makes reports to the Faculty of those who are entitled to graduation. Thousands of reports are made annually, not only to parents and school principals, but also to other colleges which former students may wish to enter or to employers with whom they may be seeking positions.

This office is responsible also for certifying to the eligibility of each student who participates in inter-collegiate athletics. The Registrar's other duties include serving as Secretary of the Faculty and of several of its most important Committees.

HUGH HARRIS CALDWELL
A.B.
Registrar and Secretary

FRANK KING HOUSTON
C.P.A.
Treasurer

TREASURER

THE office of the Treasurer combines the various business activities of the school together with the duties and responsibilities of all financial transactions. The Treasurer is appointed by the Board of Regents and acts as their agent. He is also Property Custodian and Purchasing Agent and is charged with the duties of collecting and disbursing all funds. The present Treasurer endeavors to conduct his office in such a manner as to promote friendly relations with everybody while at the same time maintaining financial integrity.

FLOYD FIELD
A.B., M.E.
Dean of Men
Head of the Department of Mathematics

THE DEPARTMENT OF MATHEMATICS

THE foundation of engineering is mathematics, and the foundation of mathematics is correct analysis. Hence this department has the task of developing proper mental processes while providing the necessary mathematical equipment of the engineer.

The purpose of the Mathematics Department is to serve the student in this important twofold capacity for each degree course at Tech.

THE DEPARTMENT OF CHEMISTRY

THE Department of Chemistry serves the School in several capacities. In the first place courses are offered in General Chemistry required of all engineering students, as Freshmen. Also, for those who elect Textile and Ceramic courses, additional advanced studies in Chemistry are given. Metallurgy is given to several of the engineering groups. A degree is offered in Chemical Engineering for which we have acquired laboratory and equipment facilities for fundamental studies in that specialty. Finally, students who are qualified may find courses of a post-graduate character leading to the Master of Science diploma. Our graduates in Chemical Engineering inform us that they find themselves satisfactorily trained to meet those from other institutions on a competitive basis.

GILBERT HILLHOUSE BOGGS
Ph.D.
Head of Department of Chemistry

THE DEPARTMENT OF CIVIL ENGINEERING

YEARS ago there were no engineers except those in military service. As citizens, not connected with the army, began to do engineering work they were called civil engineers to distinguish them from the army engineers, thus originating the title "Civil Engineer."

This field of engineering is so broad that no one can become expert in all its branches. It is the engineering of construction and building and comprises several divisions. There is the Railroad Engineer, the Structural Engineer, the Sanitary Engineer, the Hydraulic Engineer, and the Highway Engineer.

The Georgia School of Technology, in her course in Civil Engineering, joins with a basic training in mathematics and the sciences, fundamental training in all these divisions, thereby turning out graduates well equipped to handle work in any of them.

FRANKLIN C. SNOW
C.E., Sc.D.
Head of the Department of Civil Engineering

THOMAS WILLIAM NOEL
M.B.A., C.P.A.
Head of the School of Commerce

THE SCHOOL OF COMMERCE

THE numerical growth of the Schools of Commerce has been the educational phenomenon of the past three decades. It is indeed heartening to find that the scholastic growth and development has kept pace with the numerical growth.

During the first decade the Schools of Commerce were compelled to devote most of their curriculum to the teaching of the "tool" subjects of bookkeeping, stenography, typewriting and penmanship. During the second decade an attempt was made to expand the curriculum to include the teaching of business principles as exemplified in the business practices of that period.

During the present decade the Schools of Commerce have assumed a leadership and they are today attempting to formulate and transmit business ethics and principles rather than to follow the present business practices.

JAMES ERSKINE MCDANIEL
M.A., LL.B.
Director of the Co-Operative Department

THE CO-OPERATIVE DEPARTMENT

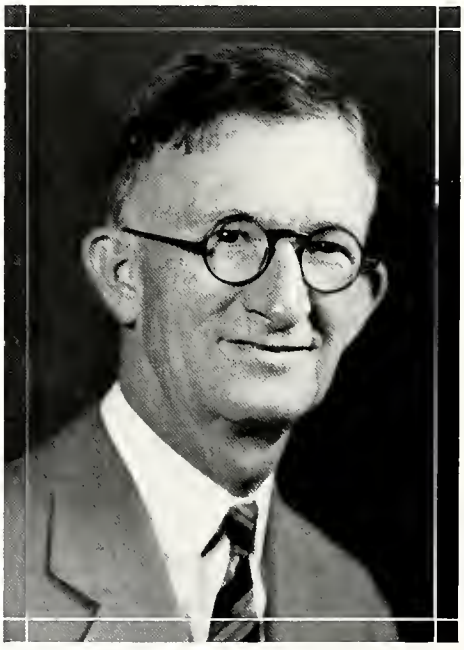

THE Co-operative Department offers engineering and commercial practice experience, at intervals, with large companies throughout the Southeast, thus giving a distinctive characteristic to the Co-operative Courses. During these trying days of unemployment and bad economic conditions the Co-op graduate, by reason of his having served his apprenticeship period, should be in more demand than the graduate who has had no practical experience.

Another distinctive characteristic to the Department is the rigid requirement both on the admission of applicants and on the scholastic standing of those students who have already been admitted. Only applicants who have high averages and only students who can maintain good grades in class may pursue the Co-operative Courses.

THE DEPARTMENT OF ELECTRICAL ENGINEERING

THE Department of Electrical Engineering was established in 1896. In 1900 the Legislature appropriated $10,000 to be used toward the construction of the Electrical Building, provided the President and Board of Trustees raised $25,000 for the same purpose. This condition was promptly complied with. At that time there were only five other buildings on the campus: Academic, Shop, Knowles, Textile, and Swann.

At present, the second floor of the building is used for electrical laboratory work, while the third floor is used for class rooms.

THOMAS WITT FITZGERALD
M.E., E.E., M.S.
Head of the Department of Electrical Engineering

THE DEPARTMENT OF MECHANICAL ENGINEERING

WE believe that employers consider the following points in the selection of young Mechanical Engineers. Honesty is placed first, then ability and definiteness of purpose. They want them to have a mind trained to assimilate new ideas and to arrive at correct conclusions from given facts; to have the ability to express their ideas on paper in good English and to express ideas in public if need be; the ability to mix with their fellowmen; and a knowledge of organization and administration.

In addition to the above the young engineer is expected to have a sound general and technical education which forms the basis of Mechanical Engineering.

ROY STEVENSON KING
M.E., Sc.D.
Head of the Department of Mechanical Engineering

HIBBARD SPENCER BUSBY
B.S., M.E.
Director of the A. French Textile School

THE A. FRENCH TEXTILE SCHOOL

THE textile industry is one of the oldest in the world and one of the most necessary, as it supplies one of man's fundamental needs, clothing. The past twenty years have seen a remarkable growth in this industry in the South, so that now it far outnumbers the East in mills and in spindles.

The Textile Department at Georgia Tech was the first established in the South, and during a period of over thirty years it has built up a reputation for good work.

The course, leading to the degree of Bachelor of Science in Textile Engineering, gives a foundation in the basic engineering principles, with a very thorough study of the raw materials, processes, and machines peculiar to textile manufacturing. All work is the same until the Senior year, when the student may take one of several options offered, and thus specialize in the work in which he is most interested.

ALLAN BENTON MORTON
M.A., Sc.D.
Dean of Summer School

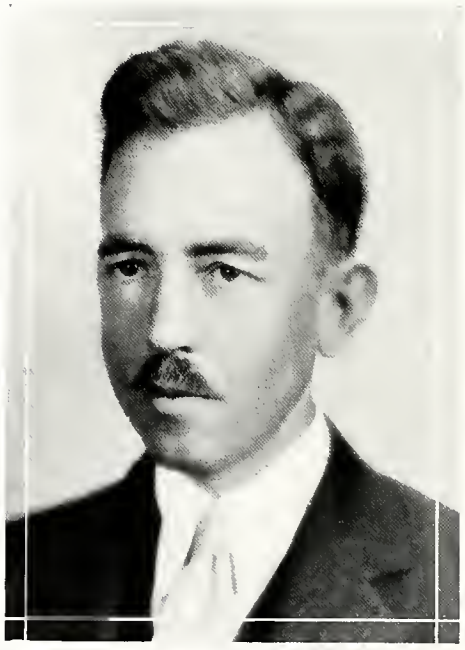

SUMMER SCHOOL

THE thirty-sixth session of the Summer School will begin July 18, 1932. This School was instituted for the purpose of preparing boys for entrance and continued that function for many years, but the increase in the number and the proficiency of the high schools have reduced the preparatory work to a minor roll. At the present time the chief function is to render assistance in college work for three classes of students: Those who are behind in their work; those who come here from other colleges and have not had subjects included in their courses; and those who wish to do advanced work in order to finish earlier or more easily.

THE DEPARTMENT OF ARCHITECTURE

THE Department of Architecture, with an enrollment of one hundred and twenty-five students, is probably the largest school in the South offering the straight architectural course. The normal number of graduates is about eighteen, but this year, 1932, thirty men are receiving degrees, the largest class on record.

Georgia Tech is a member of the Association of Collegiate Schools of Architecture and is accredited by the American Institute of Architects. Individual examples of student work have from time to time received high awards from the Beaux Arts Institute of Design in judgments held in New York in competition with the work of other architectural schools throughout the country.

HAROLD BUSH-BROWN
M.Arch.
Head of the Department of Architecture

THE DEPARTMENT OF CERAMICS

THE ceramic or clay working industry is an old, old industry. Its development and growth have been parallel to that of mankind itself. Imagine life today without tableware, glass, brick, sanitary ware, pottery, and a host of other equally important ceramic products! Of all Nature's resources, clay and earthy minerals, the basis of clay wares, are among those most indispensable to man.

Georgia, fortunately, has within its borders a wide variety of clays and ceramic materials. To make the most practical use of these resources, and to train men in the art of clay working, are the objects of the Department of Ceramics.

ARTHUR VAN HENRY
Cer.E., Ph.D.
Head of the Department of Ceramic Engineering

MONTGOMERY KNIGHT
B.S. in E.E.
Head of the Department of Aeronautics

THE DEPARTMENT OF AERONAUTICS

THE work of the Daniel Guggenheim School of Aeronautics includes both teaching and research. An undergraduate course is offered leading to the degree of Bachelor of Science in Aeronautical Engineering. The first two years of this course are practically identical with those of the Mechanical Engineering course and at the beginning of the Junior year a limited number of students is selected to take the aeronautical work. Graduate courses leading to the degree of Master of Science are also offered.

Two wind tunnels have been built to provide the necessary basic apparatus for the research work which, for the present, will be chiefly of an aerodynamic nature. A well-equipped shop under the supervision of an expert mechanic has also been provided for building the models and apparatus used in the research.

OFFICERS OF ADMINISTRATION

Marion Luther Brittain, A.B., LL.D. *President*

William Vernon Skiles, B.S., A.M., Sc.D. *Dean*

Hugh Harris Caldwell, A.B. *Registrar and Secretary*

Frank King Houston, C.P.A. *Local Treasurer*

Arthur Van Henry, Ph.D. *Director of the Library*

Arthur Hammond Armstrong, B.A., M.A. . . . *Superintendent of Dormitories*

John Jackson London *Captain U. S. N., Commandant*

Olin H. Longino *Major, C. A. C., U. S. A., Commandant*

Henry M. McGehee *Surgeon*

Allan Benton Morton, M.A., Sc.D. *Dean of the Summer School*

Roger Sheppard Howell, B.S. in M.E., M.Sc.
Director of the Evening School of Applied Science

Floyd Field, A.B., A.M. *Dean of Men*

Roy Stevenson King, M.E., M.Sc., Sc.D.
Superintendent of Building, Grounds, and Shops

George McIntosh Sparks, M.A. . . *Director of the Evening School of Commerce*

Harriet Henderson *Secretary to the President*

Mrs. William Reid Taylor *Secretary to the Committees*

BOOK
THREE

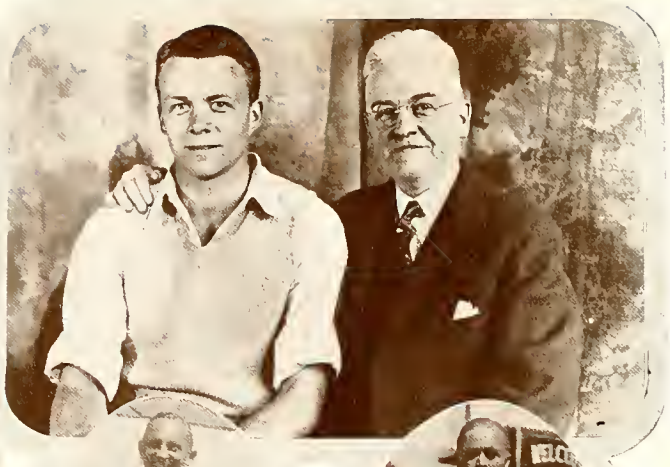

PHOTOGRAVURE

WITH THE CONCENTRATION OF POPULATION IN VARIOUS SECTIONS OF THE COUNTRY, A FASTER AND MORE DEPENDABLE MEANS OF TRANSPORT WAS FOUND IN THE LOCOMOTIVE. , , , , ,

Some of the boys seem to be getting a little suction with the members of the faculty as may be seen from the upper right hand picture.

Some prominent people and events that took place at Tech this past year. Honor day and the giving out of the President's gold T's.

Mr. Ivan Allen and Ivan, Jr., Dr. J. R. Mott, Mr. Chip Robert, President of Georgia Tech Athletic Association; President Brittain, Unkle Heinie, Mr. Winston Churchill and others.

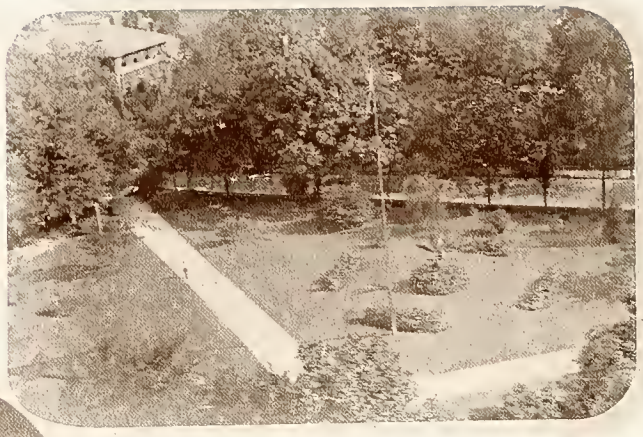

Views of the campus at various times and some of the Atlanta skyline as seen from the top of the Academic building. The Akron as it passed over the campus, and a shot of the Academic building at sunset.

Some of the shots that were taken at the football games this past season. Captains Neblett and Downes shaking hands before the Georgia game this year, Mr. Robt. T. Jones and Bobby, the Florida band between the halfs, Scabbard and Blade initiation, and an action picture of the Cheer Leaders.

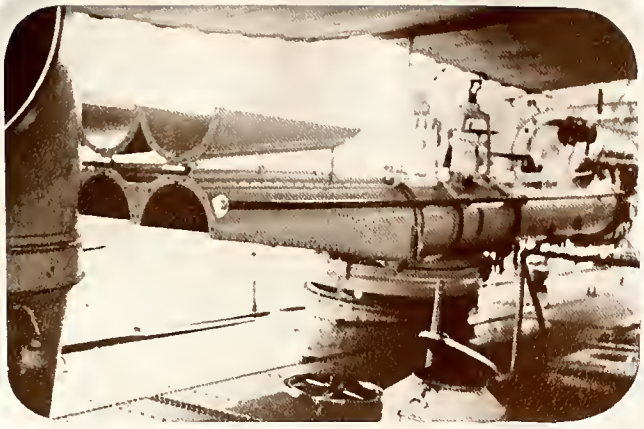

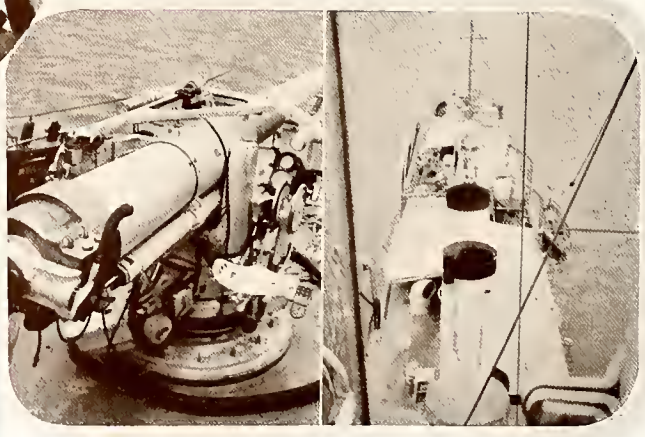

The navy went Bermuda this summer and here we see them in action. Life on board ship is not very hard according to the pose of Syd Williams and Jack Glenn. Then we have a few snaps of the future admirals only they have been forced to navigate on bicycles.

Some of the snaps showing the army in action at Anniston this summer. Willis Greer seems to be taking life easy and enjoying the horizontal lab. while some of the boys are learning about the ways and means of combatting the enemy.

A view of the Armistice day exercises and one of these well-known pass-in-review stunts that the army is so fond of giving.

Ye ole Editor and Business Manager of the Yellow Jacket seem to be enjoying themselves—maybe they made some money this year.

Mr. and Mrs. Williams at the dances this past February—seems as if they are enjoying themselves at any rate.

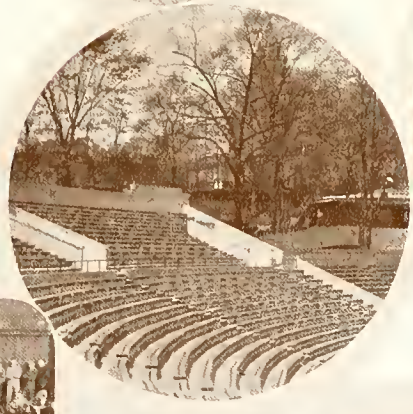

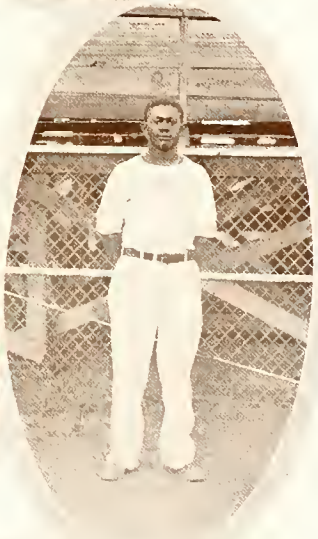

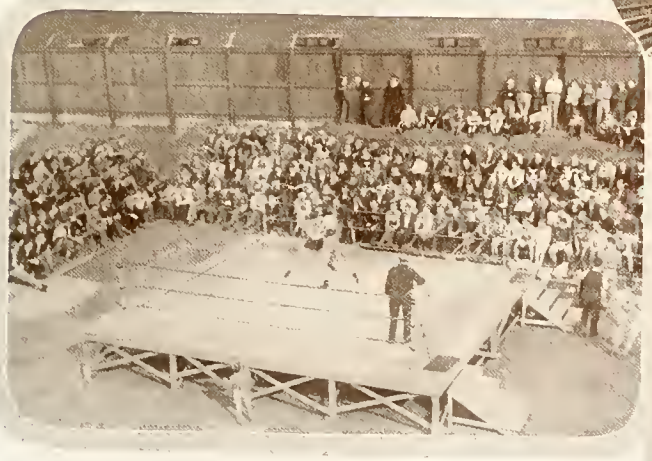

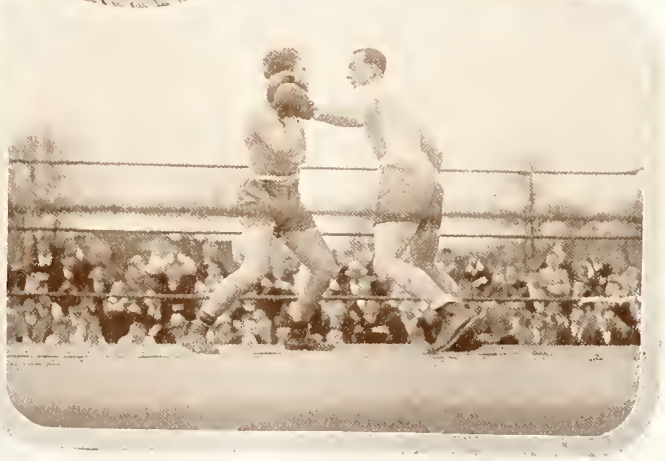

Some snaps of the various sports that may be seen during the early spring. Then some famous men, including Mike Chambers and Tubby Walton, not to mention Roosevelt the handy man. A snap of the stadium when it is not in use completes the round.

It seems as if the May Queen was elected in due form although military order had to be enforced in doing so, at least from the looks of the defenders of the ballot box.

Just a bit of fun in the life of an electrical engineer would be a fitting caption for the initiation that is being held by the boys carrying the telegraph poles around.

The time-honored custom of warming up applies to more than one place as well as the throwing of eggs at some one other than Rudy Vallee, in the annual May Day exercises.

BOOK
FOUR

FRATERNITIES

PARALLELING THE RISE OF THE LOCOMOTIVE OVER MORE PRIMITIVE LAND METHODS, SO HAS THE STEAMSHIP COME TO TAKE THE PLACE OF THE WINDJAMMER. ' ' ' '

HEAD COACHES

COACH WILLIAM A. ALEXANDER
Football

IN COACH ALEX, Georgia Tech has one of the most outstanding men in Southern Football. We are indeed fortunate in having such a man to direct our athletics.

Due to Coach Alex's efforts the Southern Conference Track Meet was held here this year.

THE BASKET-BALL team under Coach Mundorf's leadership has become one of the leaders in Southern Basket-ball. Although being eliminated in the first round of the conference this year they had the honor of defeating some of the most outstanding teams in the South.

COACH ROY MUNDORF
Basket-ball

HEAD COACHES

COACH BOBBY DODD has taken over the baseball team this year and although most of the best material has turned pro Bobby is doing very well. Bobby comes to us from the University of Tennessee.

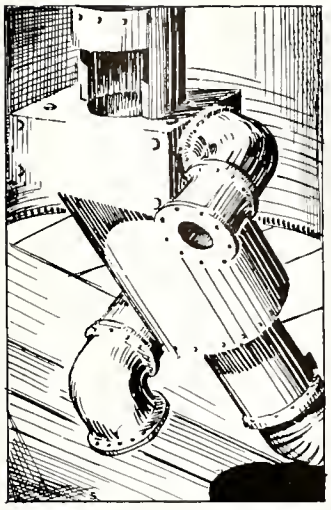

COACH BOBBY DODD
Baseball

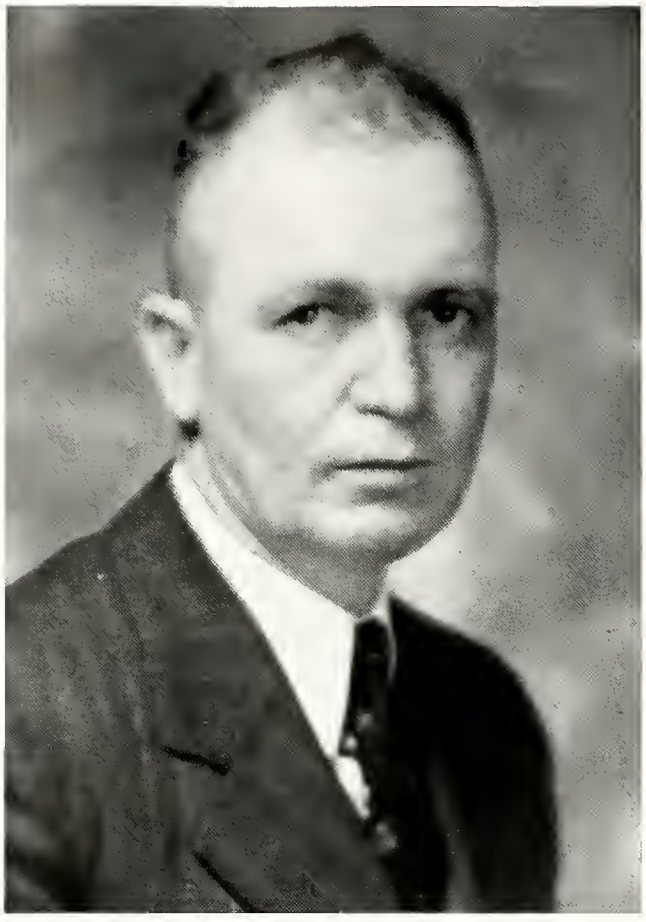

COACH ED HAMM
Track

AFTER A VERY good season last year on the track, Coach Hamm brings us another fine track team. Although not as experienced as some of the other coaches, he has worked wonders for the squad.

FOOTBALL

By Ed Danforth

Sports Editor Atlanta Georgian-American

ASTONISHING in many respects was the performance of the 1931 football team that represented Georgia Tech. What was accounted a green and not particularly talented squad began the season with excellent prospects, the papers said, of winning no games at all.

Instead, the Yellow Jackets took early larrupings, got up grinning, asked for more, got it and finally hit a winning stride. They played themselves absolutely "out" physically in every game of a schedule that would have pressed the best team Tech ever had to win, yet every Saturday they gave the opposition fits. So gallant was their play against odds, that the Atlanta press hailed them as heroes even in defeat. And the Tech student body rallying loyally around them supported the team with a spirit rarely equalled in any institution. The Yellow Jackets, both play-

ers and students, have learned after all these years that there is considerably more to football than merely winning, a lesson that most institutions NEVER learn, it seems.

The Yellow Jackets with what later proved an unskillful line and a fair backfield opened with a 25 to 13 victory over a highly regarded eleven from South Carolina. Over-confidence seemed to grip the visiting firemen and the Yellow Jackets had no illusions at all. It was a heartening victory.

Then the Engineers waded into a powerful team from Carnegie Tech and got out creditably with a 13 to 0 defeat. They took a severe physical pummelling in this game and here came old Auburn with the best team the Plainsmen have had in many a year. Auburn won 13 to 0 and deserved the victory. The Tech folks could not complain.

There followed an invasion of New Orleans where Tulane, the coming champion, had been waiting. The Yellow Jackets tried in vain to stem the pressure applied by Zimmerman, Felts, Payne, Glover and their boy friends, but were swept into a 33 to 0 defeat.

And the Yellow Jackets limped back home to take a terrific pasting from a Vanderbilt eleven, 49 to 7.

At that stage of the campaign it appeared uncertain whether the squad could finish the season or not. They were punch-drunk from a series of games that would have staggered nearly any outfit in the Conference.

Yet somehow the squad was rallied and keyed up once more. And up in Chapel Hill they tied the Tarheels of North Carolina 19-19 in a game that they might easily have won with a break or two in their

favor. It was encouraging. The lads seemed to have found themselves.

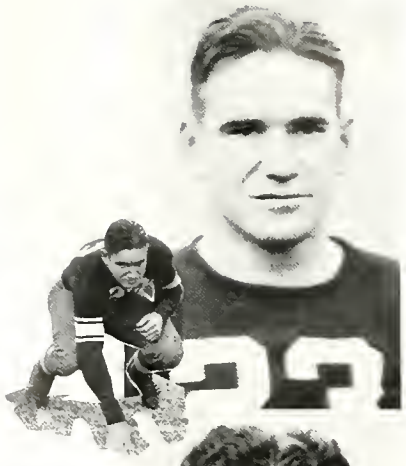

They invaded Philadelphia the next Saturday and to the amazement of all their supporters played Pennsylvania off their feet and yet lost 13 to 12. That was enough to have discouraged any club but this one.

They came home and beat Florida 23 to 0. These same Gators had beaten Tech something like 55 to 7 the year before and the revenge was ample. Then the Yellow Jackets went to work for Georgia.

It so happened that Georgia's great team decided

to play its best game of the season against the old enemy from Atlanta. The Bulldogs were letter perfect that day and scored five touchdowns while the Engineers were floundering. Toward dark the Yellow Jackets pulled themselves together and forward passed their way down the field to a lone counter to save a shut out and make the final score 35 to 7.

What the Engineers needed most of all was a rest it seemed. They had taken more punishment on the practice field and in games than any team could stand. They had their rest and then resumed training for the invasion of the University of California, December 26.

Doped to lose by seven or eight touchdowns and with a big crowd out expecting the worst, the Yellow Jackets permitted an early touchdown by the Bears, then rallied and scored one themselves.

And for three quarters of that game they battled the Bears on equal terms and with a few minutes to play the score was California 7, Tech 6. At last the strength of the Engineers gave out. They had played beyond their own capabilities. And after several

Tech subs were sent to relieve worn-out regulars, the Bears pushed over two quick touchdowns to win 20 to 6. That game, however, stamped the Yellow Jackets as a real team. They had learned their football in a hard school. And they will come back in the fall with nearly the whole team that played against California ready to go with more confidence than ever. Their schedule is tough, but they will have a better record at the finish as sure as shooting.

Varsity letters were awarded men who played 100 minutes or more. The awards went to Captain Neb-

GRAY DEVILS

A LARGE part of the success of the football team depends on a group of hard working boys which is never heard of except in the roll of scrubs. It is this part of the team that the Varsity has to depend on for experience against the opposing teams' plays. Each week a new set of plays are turned over to them to learn and each week they are tried out against the Varsity.

This group of boys never gets the publicity that it deserves and for this reason we hope that in the near future they will get their just reward and be recognized as an integral part of the team.

FRESHMEN

THE freshman team this year had about a fifty-fifty break as far as the games go. Although they were defeated in three out of the five games played they had some fine material to send up to the Varsity squad this spring.

In the game with Monroe A. and M. they were defeated in the biggest upset of the year, the score being Monroe A. and M. 6, Tech 0. This was the first time in the past seven years that this has happened. However after this defeat they came back to beat the Furman freshmen by the score of 20-12 on October 24.

In the next game which the baby Jackets played down at Florida they were defeated very badly by the Gators to the tune of 25 to 0. This was due to a shift in the regular line-up and to the fact that the boys were on their first trip from home.

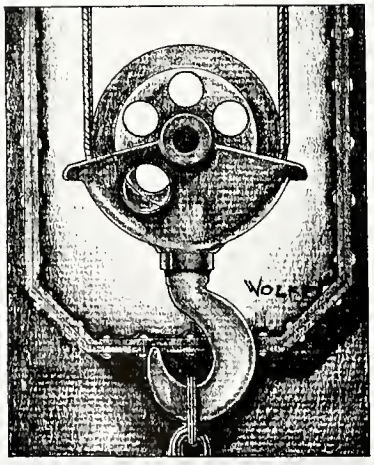

The next game that was played was at South Georgia State College and the results were very favorable for the freshmen, they won this game by the safe margin of 20-7.

In the final game of the year which was played on Thanksgiving Day was against the Georgia Bullpups and they were defeated by the score of 20-7.

The Freshmen that showed up the best during the season were Dean, Williams, Susong, Shaw, Wilcox, Swift, Sacket, Roberts, Phillips, Thompson, Perkerson, and Morris.

Freshman Squad

WOLFE

BASEBALL

SPRADLING

THE YEAR 1931 marked the beginning of the Dixie College League composed of Mercer, Florida, Oglethorpe, Auburn, Georgia, and Georgia Tech.

Georgia Tech's pre-season games began with three seven-inning contests with the Reading, Pennsylvania, team of the International League. The professionals' smooth-working team was a little too good for the Jackets who were defeated in all three games. In their next attempt Tech split a two-game series with South Carolina.

The initial game of the League schedule was played with the Mercer Bears in Macon. The Bears copped the opener with a score of nine to seven but Clay's proteges came back with a bang the next day and routed the Maconites taking the game to the tune of thirteen to one.

MITCHUM

STRIBLING

The Jackets then continued their southward journey to Gainesville, Fla., where they battled the Florida Gators in a two-game series. The Gators and the environment were too much for the visitors, however, and they returned to Atlanta with two more defeats chalked up against them, the scores being eight to six and nine to eight.

The well-coached Oglethorpe team offered Tech her next opposition. After Tech had scored eight runs to the Petrels' seven in eight innings, the game was called on account of darkness. Nevertheless the tables were turned the next day when the Peachtree Road boys pounded out a close, six-to-four victory over the Yellow Jackets.

ROBERTS

After a day's rest, the Tech Squad joined battle again with the Mercerites who came to Atlanta eager for the fray. The visitors' hopes were dampened somewhat when a hard-hitting Tech team took the first game with a score of seven to three. Mercer's hopes were completely smashed in the second game when the Denizens of the Flats overcame them with ten runs to their seven.

Florida was the next guest in the Jacket lair. They were welcomed at Rose Bowl Field with an eight-to-four defeat administered by a smooth-playing Tech nine. The Gators were revived sufficiently by the next day though to nose out the home team four-to-three.

Auburn, the most potential threat in the League, was met next on Rose Bowl Field. The Plainsmen were unable to advance against the barrage laid down by the Tech batsmen in the first game and were left at the short end of an eleven-to-seven score. The Tigers became incensed and brought their own heavy artillery for the second encounter, besting the Jackets by a margin of thirteen to eight. This game closed a very strenuous week for the Engineers. The hardworking nine had played eight games in nine days, winning five out of that number.

CROWLEY

HOGSED

FERGUSON

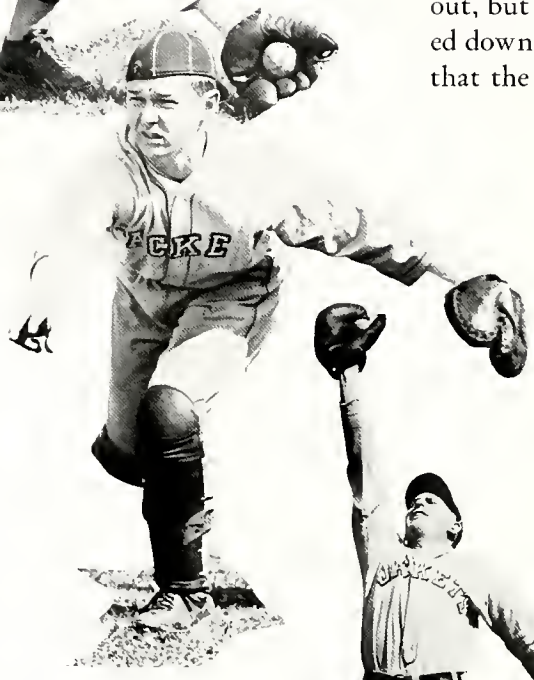

MATHIS, E.

As May brought in warmer weather, the Jackets trekked to Athens for the first two of their annual four games with Georgia. The wearers of the White and Gold lent joy to the Athenians' Homecoming by bowing to them in a game that was so hard-fought

PARRIS

WILSON

WALDREP

MATHIS

the "Loveliest Village of the Plains," the first game was again halted by rain. The Tech Squad was unable to get under way in the second game, the result being that they were blanked by the powerful Plainsman team.

Tech supporters began to lose heart when Georgia shut out the White and Gold in the first game of the last series of the season. They were not long in the vale of shadows, though, for the Jackets scored eleven runs in the last game to defeat the Bulldogs decisively.

Although Tech finished the season with her average slightly below five hundred per cent, it was a hard-played schedule, furnishing a great deal of experience to the participants. Several exceptionally good play-it seemed a tragedy to lose by the margin of a single run. The Tech nine refused to be awed by the galaxies on the second day and evened the count by winning with a five-to-three score.

The Yellow Jackets then returned to Atlanta for a few days training in preparation for an encounter with the Petrels. The first game of the Oglethorpe series was rained out, but for the second game the sun beamed down on Hermance Field with such force that the ground steamed. The Petrels were determined not to be shamed on their home lot so, in spite of valiant efforts, the Tech team was unable to tally more than five runs while Oglethorpe sent eight men across the plate.

On the Techsters' trip to

ers who were developed on this team are now making good in professional circles. Notable among these are McKee and Farmer who advanced to the Cracker staff.

Freshman Squad

BASKET-BALL

M. Isaacs

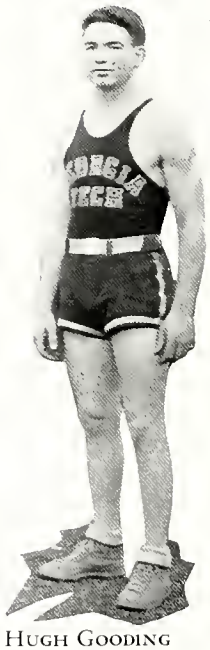

Roy McArthur

THE basketeers of Coach Roy Mundorf completed a fairly successful season, winning seven out of twelve scheduled games. Team work was the outstanding achievement. The pass-work was excellent, and the defense of the Jackets clicked continuously.

The offense was led by Bill Perkins, rangy center, and Hugh Gooding, a most versatile forward. Perkins, although not reaching his high-point record of last year, shot baskets from any position. Gooding, with his accurate pass-work, fed the ball to his teammates and contributed many points himself.

Jimmy Slocum, sophomore forward, distinguished himself with his passing and his ability to handle the ball.

Hugh Gooding

The defense was led by the veteran Roy McArthur, with John Poole, and Jess Davis alternating at the other guard position.

Ted Raines was out most of the season with a knee injury. He returned for the last of the season, and played exceptionally well.

Kitty Katz, the diminutive forward, displayed, especially against Vanderbilt, his ability to find the basket.

Mathes and Payne, reserve forward and guard, gave much support to the team.

The Jackets started the season by defeating Florida in Gainesville. They then journeyed to Auburn and were defeated. Vanderbilt was next easily defeated. Then,

Bill Perkins

in Macon, Mercer handed them a heart-breaking one-point defeat.

The team then returned to Atlanta where the boys were victorious over the Grayson Athletic Club and Georgia. In Birmingham, Alabama was the winner. The Jackets then met Auburn in Atlanta and were victors this time.

In Athens, Georgia was too tough for the basketeers, and the boys returned to Atlanta, only to meet defeat for the second time at the hands of Mercer.

Tech finished the schedule with two victories, both in Atlanta. Florida fell first, and then Georgia, the ancient rival, met defeat. This made it two out of three for the Jackets in the Georgia series.

In the S. I. C. tournament, Tech lost the first game, a hard-fought battle, to L. S. U.

AL. MATHES

DESPITE a bad beginning the Tech Freshmen completed a good season under the able leadership of Coach Bobby Dodd. Although this was Coach Dodd's first year as coach of the Freshman team he developed several fine players who are expected to add greatly to the strength of the Varsity next year. Among these are: Glenn, Woodall, Crawford, Phillips and Wilcox.

The Jacket yearlings lost their first game of the season to Tech High of Atlanta, Crawford being the bright star for the Frosh, scoring 13 of his team's points.

The Tech Freshmen avenged this by defeating Commercial High of Atlanta, 29 to 21. Next the Freshmen defeated Boys' High of Atlanta, 26 to 15. In this game Woodall led the Baby Jackets attack and was high-point man of the game.

The Tech Freshmen lost their second game of the year to Decatur High in a closely fought game with Decatur on the top of a 23 to 19 score.

The Freshmen then journeyed over to Athens and in a thrilling game overcame the Georgia Freshmen by shooting a field goal in a last minute rally to defeat them 25 to 23. Glenn proved to be the shining light of Tech Freshmen's offense, accounting for 9 points. He was ably assisted by Gibson and Woodall.

The Marietta Athletic Club proved to be too strong for the Freshmen and defeated them by a score of 30 to 27 in a closely fought game played in Marietta.

Peacock School was easily defeated by Baby Jackets to the tune of 55 to 17.

LaGrange High was beaten by the Freshmen and a victory over Lanier High followed this. Canton High was easily defeated in Canton and also in the return engagement played in Atlanta. G. M. A. was barely defeated by a 16 to 15 score.

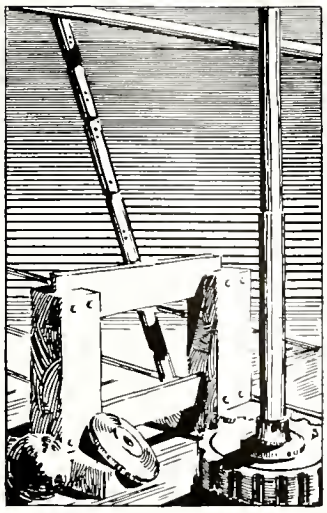

The next game was with the Georgia Freshmen in Atlanta where the Tech Freshmen defeated them by the decisive score of 37 to 17.

As a climax to the season the Freshmen journeyed to Newnan where they defeated the Newnan Athletic Club and the Newnan High School in a double-header.

The shooting of Woodall and Crawford was outstanding throughout the season, and the defensive work of Glenn and Wilcox stood out in every game. Gibson starred in practically every game with his floor-work and defensive play. Orr shows promise of becoming one of the best centers in the South. Phillips, Hammond, Johnson and Burnett also played good when called upon.

PAYNE

TRACK

1931 TRACK

NINETEEN hundred and thirty-one marked the first year of the Tech Track team under the tutelage of Ed Hamm, former Tech and Olympic star. The season was opened by a meet with Furman University which Tech won by the score of 91 to 35. The following week the team met the strong North Carolina aggregation and was defeated by the score of 89 to 37, which was a great improvement over the previous year's score. The meet, which was to have been held at Clemson, was called off due to a quarantine in effect at Clemson and, instead, a meet was held with the strong Freshman team. The Varsity won by the score of 82 to 27. Tech took several prominent places in the Southeastern A. A. U. and then on May 2 faced her greatest rival, Georgia. After one of the most exciting meets ever held on Grant Field and in which the outcome was undecided up to the last event, Tech came through with a brilliant victory to the tune of 65 to 61. The season was closed by a meet with Auburn in which the Plainsmen were the victors.

WELLS

GALLOWAY

MCCARTY

CAIN

MURRAY

The schedule for 1932 is as follows:

April 9—Clemson, at Clemson.
April 16—University of Kentucky, in Atlanta.
April 23—Southeastern A. A. U., at Tuscaloosa.
April 30—University of Georgia, in Athens.
May 7—Auburn, in Atlanta.
May 20-21—Southern Conference, in Atlanta.

Among the outstanding candidates for the team are:

FOXHALL—Ed is a sure point-getter in both high and low hurdles. His graduation will be a distinct loss to the team whose colors he has carried to victory during the past four years.

LAFORGE—Charlie is a star in the 440 and mile relay and will be hard to replace when it comes to selecting a team for next season.

GOLDSMITH—Jerry is the find of the 1931 season. His performance in the 440 can always be counted on.

GALLOWAY—Charlie carries Tech's hopes in the 100 and 220. His ability is attested to by the fact that he was the only Tech man to compete in the Indoor meet at Chapel Hill.

WILLIAMS—Herb was a star in the dashes and has added to his laurels by his ability on the low hurdles.

CAPT. FOXHALL

ALT. CAPT. LAFORGE

GEGENHEIMER

WILLIAMS

YARBOROUGH

GRAYDON—Doug is a star in the javelin throw and is also a good quarter-miler and relay man.

CAIN—Tom tosses the shot and discus for the team and adds many points to the final score by his efforts.

GEGENHEIMER—A mainstay in the distance events. He is a Junior and will return next year.

GATLIN—Gene comes up from the Freshman ranks to take his place as star in the pole vault and javelin throw.

MCCARTY—George is the best of a large number of high jump aspirants.

SPIEVAK—His improvement in the broad jump has been marked in the last year and better things are expected.

MURPHEY

LACKEY

KELLEY

GOLDSMITH

GATLIN

MORGAN—Is a most creditable performer in the high hurdle and pole vault events.

MURRAY—Don who is credited with record-breaking performances has been handicapped by an injured leg.

YARBROUGH—Tom is a star 440 man who has been converted into a half-miler.

Other outstanding members of the team include BEN SMITH, FRANK WILSON, LEONARD, PAT MURPHY, J. B. BAKER, "FOOTS" GATEWOOD, DEAN KELLEY, W. D. MCMICHAEL, EDWARDS, PRATER, RAY MILLER, WAINE ARCHER, BOB WARDLE and others.

1932 TRACK

SINCE the track season is not completed we will have to give the results that have been turned in so far.

The season opened with bright prospects for the year and it was with a great deal of pride that we were able to return most of last year's team to active service.

Under the guidance of Coach Hamm the team has had a very good season so far in that they have not lost a meet. The first meet was held at Clemson college and they were defeated very easily to the score of 85-41.

The next meet was held against Kentucky at Grant field and this meet was about the same as the Clemson meet, the score being the same. Kentucky was crippled in the meet however, by the loss of their star sprinter, Shipwreck Kelley. The track was slow and no records were set, but good times were turned in on all of the sprint events.

Charlie Galloway, the sprint man of the outfit has done a good job of it this year and has won practically all of the meets that he has entered; however, he was closely pushed by another one of Tech's sprint men, Dean Kelley, who has shown up very well this season.

The team travels to Georgia next week to compete with them and it is hoped that they will uphold the record set so far. The week following that, the Jackets meet the boys from Auburn, and the next meet will be the Southern Conference that is to be held in Atlanta.

GRAYDON

LEONARD

SPIEVAK

SMITH

CLARK

PRADOR

1932 FRESHMAN TRACK

IT IS during the year spent on the Freshman squad that men get the foundation on which they build future championships. Competition with the Varsity and other Freshman and High School teams aids in developing men for the Varsity teams. During this period of training the Freshmen are under the care of Ed Hamm, former Tech star, Olympic and World's champion in the Running Broad Jump. Assisting Coach Hamm and having direct charge of all distance men is George Griffin, another former Tech star and now Assistant to the Dean of Men.

Among those who show promise of making the 1932 Freshman team a winner are: Hunnicutt, Tufts, Huguley, Kirkpatrick, Davenport, Cunningham, Braswell, Seay, Busbee, Dean, York, Moore, Smith, Anderson, and Brittain.

The schedule for 1932 is as follows:

April 13—Tech High, Boys' High and Georgia Military Academy.

April 16—Boys' High School.

April 23—Southeastern A. A. U. in Tuscaloosa.

April 30—University of Georgia Freshmen.

May 3—Tech High School.

May 7—Auburn Freshmen.

CROSS-COUNTRY

JONES

SHOWING marked improvement over the form shown in the past three or four years the Cross-Country team under the leadership of Captain Gegenheimer passed through a successful season during the past fall.

The first meet of the season was lost to Tennessee by 2 points, the score being 35 to 37. The next meet with Auburn who had shut Tech out the year before was won by the score of 17 to 50. Following this was the race with Georgia which Tech won 27 to 28.

The only disappointment of the season came during the Conference meet in which several unfortunate happenings robbed the team of its main strength and effectiveness. One man was placed on probation just before leaving for North Carolina and another was taken ill the day of arrival and could not give his best. The team finished sixth.

The Freshmen also passed through a winning season. Boys' High and Tech High were defeated in dual meets and the Freshmen were winners in a three-cornered meet with Georgia Freshmen and Boys' High.

OTHER SPORTS

TENNIS TEAM, 1931-1932

THE improvement shown by the tennis team of 1932 over that of 1931 has been nothing short of remarkable. In 1931 every match but one was lost. With return of all of last year's men and with the addition of three new men, Maynard, Morgan and West, the three intercollegiate matches played so far this year have been won. Florida was defeated 6 to 1, Alabama 5 to 1, the first match that Alabama has lost in three years, and Georgia 4 to 2. All of these teams defeated Tech in 1931.

Matches left to be played are with Auburn, Furman, Maryville, Chattanooga, Tennessee, Suwanee, and Vanderbilt.

Captain Jack Conniff has proven his worth as a leader and indications are that Tech will end the season with a very good record.

The main strength of the team lies in its all-around ability, no one man being outstanding.

Following is the Varsity Squad: Conniff, Captain West, Morgan, Maynard, Jackson, Robertson, Pindar, Rivers, Brine and McGinty.

In the two Freshman matches played up to this writing, the Freshmen have returned victorious. Malcolm Keiser, old Tech High player, is captain and Billy Reese, Atlanta and Georgia State champion, is No. 1. The other members of the team are: Crawford No. 2, Glenn No. 4 and Holcomb No. 5. Others on the squad are Arrington, Johnson, Reid and Hemrick.

GOLF

THE Georgia Tech Golf Team enjoyed a fifty-fifty season during 1931, winning four matches and losing four. The defeated teams held the rivals of Tech which added to its delight, those being Emory, Georgia, Alabama and Davidson. The defeats were at the hands of Florida, Tulane, Duke and North Carolina. In the tournament at Athens the team took fifth place, while Captain Hudson went on to win the first flight consolation.

SWIMMING

AGAIN Georgia Tech's Golden Tornado Swimming Team turned in a record of which we should all be proud. By virtue of their overwhelming defeats of Emory, Georgia and Florida, they again copped the Southern Conference Championship and set a new record for Southern collegiate swimming by bringing their total number of wins to thirteen in as many starts.

Beginning the season under great difficulties when Williams, Wagner and Kennickell, three of last year's stars, were lost from the squad, Coach Kenneth Thrash moulded a very formidable team from the coming sophomores and the few returning veterans of last year. They opened the season by swamping Emory 55 to 20, and not content with administering our friends from the Coca-Cola school their first defeat, ran rampage over our ancient rivals from Athens by the equally impressive score of 59 to 24. Following the Georgia meet, the State meet was entered, and, when the water stopped splashing and the final check-up was made, Tech had almost twice as many points as their nearest rival. Desirous of new fields to conquer, and tiring of the warm waters of the Athletic Club pool, the tankmen trekked to Gainesville in order to meet the mermen from the University of Florida. Tech was pushed hard in this meet, but emerged victor by the score of 52 to 32, thereby closing a very successful season for the wearers of the Gold and White.

To pick an outstanding man would be out of the question but special credit should be given where credit is due. Ed (Fish) Fain, captain of the team and champion in the 220-yard event, did exceptionally well and deserves special mention. "Snowball" Stover, captain-elect for next year, was high-point man for the year and shows promise of developing into something real big next year. Others showing up well and winning letters were: C. Ingle, Young, J. Ingle, Patton, Gowan, Hurst, Terrell, Brown and Austin.

BOXING

SINCE the appearance on the campus in 1930 boxing has enjoyed a steady growth. The boys have taken more interest in this particular sport than any other and it is hoped that in the next few years the school authorities will permit intercollegiate competition. This year two members of the squad were allowed to compete in the Southern Conference and in the National A. A. U. meet held in New York. These two men were Elmo Fryer and Quint Adams. Due to a bad ear Fryer had to default in the semifinals, but he is expected to go to the Olympics this summer.

Those men going to the final round in the competitive tournament this spring were: Norris Dean, who defeated Tarzan Lackey in the heavy weight division; Adams, who defended his title successfully against Slaughter; Hearne, who defended his title against Felton; Hatcher, who defeated Chambers for the lightweight title; Butler, who defeated Fergurson for the featherweight title; Touchstone, who defeated DeGoldian for the bantam tite, and Fefferman, who beat H. Scordas for the flyweight title.

Letters were awarded to those who won their respective matches.

Boxing Squad

RIFLE TEAM

DURING the 1931-32 school year the Georgia Tech Rifle team fired sixty individual matches with other representative colleges throughout the country and won forty of them. The team for the above matches consisted of fifteen men, the ten highest counting in each match. Each man fired ten shots in the prone, sitting, kneeling and standing position.

The team won the Fourth Corps Area match for the fifth consecutive year, scoring 3,608 points out of a possible 4,000. They won third place in the William Randolph Hearst National trophy match and will receive individual medals and a plaque.

The team was coached and managed by Captain H. W. Robinson and Sergeant Patrick. The following men were outstanding in all the matches, making exceptionally high scores: Mulder, J. H., Johnson, C. G., Stapleton, C. D., Norris, J. M., Thomas, A. N., Lucas, J. W., Deichler, L. C., Veal, J. E.

THE STAFF of the 1932 Blue Print has worked with the idea in mind of giving to the student an accurate review of the school year of 1931 and 1932. It is hoped that we have in a small way accomplished this. If, in the years to come, these events may be recalled as we have tried to portray them, then we will feel that our work has been a success.

WITH a change in policy that has encouraged more people to read it and also to discuss the different editorials that have been published in it this year, the "Yellow Jacket" has grown to such an extent that none will deny its place on Tech's campus. The humor that has been published is of the best and it is hoped that it will continue to be such in the future.

HISTORY OF ANAK SOCIETY

THE Anak Society was founded on January 1, 1908. The first president was Mr. Geo. W. McCarty, now vice-president of the Ashcraft-Wilkinson Co., and also Alumni Member of the Georgia Tech Athletic Board, along with Mr. Chip Robert, another charter member of the society. The other officers were C. H. Vaughn, Vice-President, L. E. Goodier, Secretary, and C. A. Sweet, Treasurer. Mr. Goodier became one of the pioneer air officers of the army. He fell soon afterwards in a plane accident and was transferred to the infantry. Mr. Goodier later was attached to the R. O. T. C. unit here. The other charter members were G. A. Hendrie, C. A. Adamson, L. W. Robert, S. J. Hargrove, J. E. Davenport, W. R. Snyder, C. L. Emerson and G. W. H. Cheney.

The Anak Society has always been active in any movement for the forwarding of Tech and has initiated many of the most important activities on the Tech Campus.

Among the important dates in the Society's history are as follows:

1908

The formation of the Honor system which was put into effect during that year and lasted until just a few years ago.

1910

The pulling of the Y. M. C. A. out of its dark days.

1911

October 5, 1911 the first discussion of the publishing of a school newspaper. It was decided to publish the first issue the day before the Georgia game of 1911. The name chosen was the *Technique*, and the first two editors were, E. A. Turner, then Y. M. C. A. Secretary, and Mrs. Bloom. Dr. Perry was the first faculty advisor and member of the staff. The other positions were filled by students. The society and the three faculty members above picked the first staff.

1912

The year of the Band's difficulties and the appointment of the first leader by the Society, Mr. Greenblatt.

1913

The movement for the correction of the medical conditions on the Tech campus, which later led to the building of the school hospital. The Freshman cap system.

1915

The beginning of the movement of the compulsory support of student publications.

1916

The combining of the two student publications, the old *Yellow Jacket* with the present *Technique*, and the increase of the *Technique* to its present size. The first six-page paper to come out February 16, 1917.

1919

The first Tech Homecoming, to be held at commencement, 1919.

1920

Request of the formation of the first Publicity Bureau of the school.

1921

Fight against the appearance of the Klu Klux Klan on the Tech campus.

1922

Formation of Student Council.

1924

The fight against the abolishing of societies on the campus.

1929

The formation of the Yellow Jacket Club.

1931

The changing of the Pass Book for 1932-33 and the Publication of the Senior Personnel History for distribution to firms throughout the country to aid in the securing of positions for the senior class.

It has been the policy of the society since its inception to turn over to the students any activity that might be formed by the society as soon as the activity has proven worth while and self-supporting. The society has control over the welfare of the class honor societies such as Skull and Key, Bulldog and Koseme. The society, with the aid of these three societies supports a scholarship which is known as the George W. Adair Scholarship. This scholarship was started in 1912 but its name was changed soon after the death of Mr. George Adair in 1921.

OMICRON DELTA KAPPA

Its Purpose and Accomplishments

IN three years of existence on the Georgia Tech campus, Omicron Delta Kappa, or O. D. K., as it is more commonly termed, has attained the position of the leading democratic honor organization. This is only natural in that O. D. K. *is* a leadership fraternity, composed of leaders in the varying campus activities and is the only organization requiring both a definite scholastic standing and a fixed activity rating of the candidates as well as certain requirements of leadership as approved by the National Officers.

The following statement is taken from the National Constitution of the fraternity:

First, to recognize men who have attained a high standard of efficiency in collegiate activities, and to inspire others to strive for conscious attainments along similar lines.

Second, to bring together the most representative men in all phases of collegiate life and thus to create an organization which will help to mould the sentiment of the institution of local and collegiate interest.

Third, to bring together members of the faculty and student body of the institution on a basis of mutual interest and understanding.

The Alpha Eta Circle of Omicron Delta Kappa, which is the official designation given the Georgia Tech Circle, is the thirty-first of thirty-three circles representing the most outstanding institutions of higher learning over the entire United States. The organization was originally conceived at Washington and Lee University and was accordingly founded at that university in 1914. So great was its success at that institution, and such was the clamor for similar chapters in other schools that Omicron Delta Kappa has now come to its present position of esteem.

Omicron Delta Kappa is a member of the National Council of Honor Societies which includes in its eight members organizations such as Phi Kappa Phi, Phi Beta Kappa, and Sigma Zi, each being the most outstanding national in its field.

At Georgia Tech, the Alpha Eta Circle has fostered campus activities, planned and handled the dedication of the Aeronautical building, started a movement for constructing a school auditorium, sponsored the plan of school aid for graduates in obtaining employment, and has undertaken the record keeping of the extra-curricula activities of Georgia Tech students, and has made various recommendations to the Inter-fraternity Council and the Student Council concerning school problems.

Omicron Delta Kappa at Tech is proud of its faculty membership, including Dr. Brittain, Dean Skiles, Dean Field, Dr. Reade, Dr. Armstrong, Prof. Narmore, Prof. Wenn, Coach Alexander, and Mr. George Griffin. It is particularly proud of its honorary membership including the king of golfers, Bobby Jones; Mr. Howard Coffin, President of the Hudson Motor Company and foremost developer of the State of Georgia; Mr. George Crawford, who is the President of the Jones-Laughlin Steel Corporation; and George Marchmont, President of Graybar Electric Co.

GEORGIA SCHOOL *of* TECHNOLOGY

"A Technical School With a National Reputation"

THE GEORGIA SCHOOL OF TECHNOLOGY offers to young men of ability and ambition a training which will fit them for positions of responsibility and power. The national reputation of this institution is based not on claims, but on results. Its greatest asset is the record which its alumni are making in the productive work of the world. Georgia Tech graduates succeed because they have been trained both to think scientifically and to work efficiently.

Courses in Civil, Electrical, Mechanical, Textile, Chemical, Ceramic and Aeronautical Engineering, Architecture, Commerce, Industrial Education and General Science. Evening School of Commerce.

Coast Artillery, Signal Corps, Infantry and Ordnance Units of the R. O. T. C., also Naval R. O. T. C.

DIRT--THE FACTS

Many times this year the question has been asked, "Why isn't there any dirt in the Yellow Jacket? When is it going to be like it was several years ago?" The easiest answer is that the faculty will cut anything even approaching a dirty joke. This is partially the truth, but does not explain the entire situation. Without wishing to appear puritanical or saintly, the editor has enough self-respect left to want to put out a college comic that will be at home in any company and be a decided credit to Georgia Tech.

The only excuse for a college comic magazine is that it should make for a few happy and light moments between our more serious thoughts. If it fails in this by offending some of its readers, the other good done has been nullified.

Without a doubt, some of the funniest jokes ever heard are those having shady or entirely dirty meanings. These jokes are told in proper company under certain circumstances, however, that entirely qualify the story as a humorous instance. A publication is handicapped, on the other hand, in not being able to limit certain parts to certain readers. Very few shady jokes have a place on the printed page, especially that representing an institution of higher learning. Funny to the extreme in conversation, a questionable story usually becomes obscene when seen in print. The personality of the narrator is lost.

In ending, let us say that we are still receiving so-called "dirty jokes" and, to be truthful, hope that we continue to find them in the contribution box. They add zest to a "bull-session." Just get a member of the Yellow Jacket staff to tell you a few of these wild stories. They're good! (Too good, in fact, to be seen in this issue)

Having a warm date in an Austin 'n Lizzie like trying to play a horn loose in a telephone booth.

"Robby" Robinson

"It is better to have loved and lost—yes for better.

Could it have been only ten years ago when . . . "Neck" was first used as a verb . . . The country first ran out of beer . . . George Tech was a mechanical school with a rational temple . . . Legs were seen only in bathing suits . . . Two pluri two equaled four . . . Freshmen were treated as freshmen . . . King Tut was all the rage . . . Art, woman wore hats . . . Could it?

Wife (standing over prone form of her husband) — Is there any hope, Doctor? Doctor — I don't know, madam. Just what are you hoping for

STUDENT COUNCIL GOES HAYWIRE

* * * * *

Senior Brawl Predicted to be Big Flop

COMMITTEE CONFESSES.

The Senior Brawl scheduled for Commencement this year is destined to be one of the biggest flops of the year declares Inter-Fraternity Council Committee.

One of the lousiest bands that has ever played at Tech will try to furnish the music, Tab Kendry and his North Africans, and the committee confesses that they will probably be non de plume and a victrola will be substituted.

Kid Billuns a big shot of the council announced in an interview that this dance was to come after other dances, and the dancers by that time will not realize that the substitution has been made.

Call it graft if you want to, he continued, but look at the salary that Amos and Andy receive for a little work, and then reconsider. What this Country needs is a better five-cent cigar, was his closing remarks.

The committee on Horizontal standing for the dances reports that they are preparing to handle more crowds than ever before.

The Decoration Committee as heretofore will forego with this crap with the exception of working hard on a report so that they might be thought of in the expense sheet for the dances.

Molls from as far north as Decatur, if that is North, and even from Gainesville, Ga., it is rumored will attend the brawl.

Tarzan Lackey has opened studios in preparation for the brawl and teaches plain and fancy wrastling as it should be on the Brawlroom floor. The recent kidnapping was the motive for the opening of the Studio.

The ratio of Male to Female this year it is reported will be 125.3245 to 1.00000000002. Which is much better than it has been heretofore; however this is a very rough estimate. The Council recommends that as many as possible refrain from coming to give the ones that are fishing room to fish.

DEANS TEAM HOLDS.

Bold Pappas Keep Pent House Mammas.

The Deans Team was triumphant last nite after being the under-dog for lo these many years.

The Apartment where the students were burning the Mid Night oil to become full fledged dyed-in the wool students of Tech was raided and the Team held like Nobody's business.

Results were two broken legs, two bad hangovers and a wrecked Apartment.

GEORGE THE BLOOD, THREATENS GANG WAR TO SAVE MOLL.

Campus Celebrity Stoops to Enlisting Help of Y Leaders.

She was me moll and they didn't do right by Nell, was the statement of George Cornell in connection with the recent Digamma Brawl.

The result being that he dashed over to the Kappa Sigma house and slew his rival, Elmer Willard Turnbull in Cold Blood.

When told he was a bad boy and that he shouldn't go about shooting people he answered that he didn't know that the gun was loaded.

With Maxie and Nahas as lawyers George was aequitted today on the Charges of Insanity. Clever these Yimker Boys.

STUDENT ACQUITTED.

John Smith of the Digamma House was today acquitted by the Fulton County Grand Jury on the Charges of Murdering his fraternity Brother.

Witnesses testified to the fact that the deceased had used the Fraternity Phone One hour and a half just before the Murder.

LOVELORN ADVICE.

By Countess Olga.

Dear Olgey: I am going with a young soda Jerker that I love dearly and with a rich old Millionaire whom I despise in spite of his money. Please advise me. Signed, Perplexed.

A.—Marry the Soda Jerker and send address of old Millionaire to the Countess Please.

Dear Countess: I Date two Betas regularly, and neither knows that the other is going with me. Would you call that leading a double life? Dot.

A.—No, go with two more and the equivalent will be a single life.

Lo, Olga: I have a date every nite in the week and men are spending lavishly on me. Would you call me a flirt?

A.—No—The word is genius.

Dear Countess: I am a college freshman, and my SYT simply loves orchids they are so rare. I can't afford them, what shall I do?

A.—Orchilds are scarcer than SYT's.

Olgey, Old Pal: I am Professor at Tech and love my dear wife with all my heart—Yet the Co-eds at Nite school just try to make me pay attention to them. What shall I do?

A.—The English Professor Lies.

KAMPUS KALANDER.

G. S. Student.

9 A. M. Wow, what a party, and a ten o'clock this morning ain't no justice.

10:30 A. M. Makes Ten o'Clock class just in time for roll call and dismissal.

10:31 A. M. Wow, but this idle time is killing me, looks like luneh time will never come.

12 M—When are you going to have lunch? Gee but I'm pooped, hard day to-day.

1 P. M. Lab at Fox Theatre.

5 P. M. Bull Session.

6 P. M. Dinner.

EDYTORIAL

SHO WE GOT AN EDYTORIAL. What good paper ain't got one? And this is a good paper.

It isn't the intent of the BLUE PRINT Staff or the Feature Editor of this year's BLUE PRINT to offend anyone or any organization, neither is it the intent to leave visions of unpleasantness in the minds of those reading the concluding pages of our offering.

Every word of this is merely in jest, and truthfully we can say that 99 and 44/100 of it is fiction. Just another manner of putting the pleasant days that we have spent at college before you so that they, we hope, will enhance memories of the days that you were students at Tech.

To offend would be a tragedy on the staff's part. Please, therefore, accept the spirit of the entire thing before making any conclusions.

We Thank You,

THE EDITOR.

1932 Boys--

Whether you graduate or not --remember that **the best place to meet and eat** wishes you every success.

DELICIOUS AND REFRESHING

DEAR MA:

What a liar the Old man must have been when he told you about his days at Tech. The beautiful campus that he painted is paved city streets lined with boarding houses. The Stately administration building is as far from the Cathederal of learning as is the Podunk Post Office from the National Capitol. And from rumors what hell raisers they must have been. The campus reeks with the history of the Class of '05, of which Dad was the illustrious President. They tell me that the biggest drinker back in those days got the Presidency, and the old man according to his reputation with the older Professors used to go on a sober, however these were not so often.

I can assure you now that things are different at Tech Cocacola and Chocolate milk are the strongest things that they drink. The studies are so hard that it is very rare that we ever see a Female.

Things are plenty expensive here, a cap costs more than they ever have before, clothing has doubled in prices, in fact everything is sky high. You know things are different in large cities than they are in Podunk. Then we ordered a lot of things from Sears Roebuck there. They are so far from here that the postage would make it impractical to order them here.

You can rest assured that I took the advise in your last letter. To be sure I go to bed at ten every night and I don't touch the foul stuff. The way the other boys drink is disgusting. What was dad referring to in his last letter when he said not to drink any corn, I always eat it and you know that. What does he mean drink it I can't quite understand.

I had a long talk with the Dean and he complimented me very highly on the work that I am doing here he says that I am doing so good that I should stay over for summer school rather than to interrupt my studies by taking a vacation.

About my studies, you asked what E was for that is excellent, the B that I got was bad but the professor tells me that it will be an E next time.

Don't forget the check, and don't try to buy the things at the store because I have gained weight and I am sure that you could not get things to fit me.

Your Son

PERCERVIL

P. S. Don't order them from Sears and Roebuck the postage rates to Atlanta are too high, Send the money and I will make the purchases. I have been made an orderly in the Military Dept. Don't get this confused with the ones that Pop sells at the corner store cause these are really something nice.

Sigma Nu

YEP, IT LOOKS LIKE Brother Sale has been a big success on the better Paris boulevards . . . And when a Sigma Nu is mowing the lawn you can always depend on there being a snake in the grass . . . Graydon is our big shot . . . And are we scholars no end. We know that our house is getting a bit dilapidated . . . But our last fire wasn't such a success . . . Give us a chance, maybe we can do a better job than the A. T. O.'s at any rate.

Kappa Sigma

MOVED INTO OUR NEW HOUSE this year . . . Not so hot at present, but the S. A. E.'s are to be our neighbors and this is sumthin' . . . Have lots of big shots and big activity men . . . The Ingle Brothers, Hardeman, Turnbull and Storey . . . Pretty solid at Tech, we are . . . And do we rate nationally? Wow! . . . No drinking is allowed on February 30th. We just gotta to draw the line somewhere . . . The Lilly of the Alley is the fraternity flower . . . which makes the convenient garage an asset.

Kappa Alpha

THE PICTURE will give you a rough idea . . . However modesty forbids the printing of the right kind of filling station . . . Get the idea? . . . We are true Southern Gentlemen . . . No doubt . . . But a true Southern Gentleman must have his weaker moments and sow wild oats . . . Wow . . . and the South is noted for agriculture; no doubt we are true . . . Southern Gentlemen . . . Drink at the Biltmore, the Driving Club, Brookhaven, or the Kappa Alpha House sometime . . . What of it, corn consumption helps the farm relief, doesn't it?

Phi Gamma Delta

WE KNOW IT . . . but nationally, we are the stuff . . . Yep, Coolidge was a Phi Gamm . . . We were originated on the Fiji Islands and have made rapid progress . . . Don't be dense, that is the reason for the funny nickname . . . We did have a big athlete . . . give us time and we have Rod Hale . . . After we live that down we will build up again . . .

Sigma Phi Epsilon

HELL WITH THE WOMEN, that's us . . . From the lowest form of buttermilk to the highest form, we RATE . . . Almost anytime you can check up and some of the brothers are entertaining . . . Then, too, the Sunkist Beauties give us a break when the Sig Alphs are not at home to the F. and M. gals . . . We got big men, too . . . Look at our Foxey and his pictures in the book . . .

(Continued on Page 6)

(Continued from Page 5)

Sigma Alpha Epsilon

No doubt you know that Bobby Jones and Rudy Vallee are brothers—and prominent Alumni . . . We have plenty . . . Our new slogan is getting us plenty of brothers . . . "One in Every Family—Eventually, Why Not Now?" . . . Nothing like a little pub. now and then to make us go over the top in our next membership drive . . . We got big men on the campus, too; lots of 'em . . . but if you have heard of Tech, doubtless you have heard of 'em . . . The battle-cry of "More Than the American Legion by 1935" . . . Is getting 'em in . . .

Beta Theta Pi

Laugh if you will, but this colossal mansion . . . Is ours—at least we hope that it will be . . . Our shelf is full of trophies . . . Yep, Brother Hamn is an athlete of note—Olympic winner and everything . . . And as for class . . . are we not about the best thing on the campus? . . . Well we reckon . . . Our prominent men have often been labeled . . . The Who's Who of Georgia Tech . . . Got plenty of suction locally and nationally too . . . The Dean is one of the boys . . . And do we control Baird's Manual, well we reckon . . .

Alpha Tau Omega

Prestige? Wow! . . . Sure, we are the oldest on the Tech campus . . . Thanks to the efficiency of the Fire Department, we are in the same old house . . . Drat it . . . Almost new, though . . . Renovated throughout . . . Wonder why those Freshmen slipped up? . . . And the plans for the new house —mansion or bungalow, or what have you, were under way . . . Don't worry about us, we have the old slogan: "A Frat may be down but he is never out" . . . Too much greatness at one time, that's what ruined us . . .

Delta Tau Delta

Yep, we have all of the campus leaders this year . . . but next year . . . 'Tis better to have loved and lost at any rate . . . Campus leaders include Wells, Williams, Whitfield, Horne and Griffith . . . Modest, these youths that answer the 'phone Delta Shelter . . . Well, maybe a Shelter is better than a barn . . . Drink Till Drunk, they have often been dubbed, however . . . they attribute the fact to the three Greek letters and punsters . . . Really, dearie, there is no truth in the statement . . .

Chi Psi

Yep, we have the house of the campus . . . and do we have swell chapters elsewhere? . . . well we reckon . . . Activity . . . Well, we do have chapters that do have activity . . . Gee, but we are strong in the East . . . Campus leaders . . . Well up at dear old whoozis they sure do have the activity . . . Gee, but we are strong nationally . . . Alumni . . . That is what we have plenty of . . . and strong . . . Well we do have the best house on the campus . . . And are we strong elsewhere, well we reckon so.

(Continued from Page 6)

Chi Phi

YOU SIMPLY MUST COME over to the lodge sometime for tae; you simply must . . . and are our dances gorgeous? . . . no wonder we are the social favorites of Atlanta . . . Why should we clutter up our occasional formals with rabble when convenient tae dances will turn the tide? . . . And do we have activity, well we reckon . . . Just look at the picture we pledged it . . . Yep, have several others equal to it . . . No wonder we are the social favorites of the campus . . . Do drop over to the lodge for tae some afternoon.

Pi Kappa Alpha

SUB-ROSA TO KAPPA ALPHA . . . Just across the street from the Southern Gentlemen . . . Well, we did have good men . . . can't expect us to keep up the dizzy pace that we started always . . . Even the best fall off their perch sometimes . . . We did have a gang of athletes; yep, at one time we even had the captain of the football team . . . We were in power at one time . . . Watch us in 1985, we are scheduled for a comeback . . .

Phi Delta Theta

AND TO THINK that this was our racket at one time . . . Shades of Butch Bearden . . . Do we have the golfers, well we reckon . . . Yates and Moore in the same chapter . . . and do we rate with the powers that rate socially in this Berg . . . Well, we reckon; ask any SYT or Debbie for the full details . . . Our raw material promises to make us one of the leaders . . . Cornell, Yates, Moore, and more campus leaders . . . Watch our dust . . . And with the ladies . . . Well watch our dust . . .

Phi Sigma Kappa

DRAT IT, WHO WAS THIS BIRD that made the way hard for the political-minded? . . . well, we did have the leaders while it lasted . . . And are we a congenial bunch? . . . well, we reckon . . . fellowship and a good time among ourselves . . . People are sometimes getting us confused with Phi Kappa Sigma . . . Can't they tell class when they see it? And Alumni . . . the foremost politicians are of our chapters . . . nothing like early training, says we . . .

Delta Sigma Phi

JUST A BUNCH of house party gals being gathered for the annual rush week . . . and do we have the brawn of the campus . . . When bigger and better athletes are available we will pledge them . . . yea, all of them . . . And do we go to church? . . . almost won the attendance cup this year . . . House parties and pink taes are never more delightful than when given in our portals . . . Do we have the big bruisers that are something in athletics? . . . Wow . . .

Phi Kappa Tau

ARE WE THE NERTZ? . . . We'll say we are . . . Business men everyone . . . very few of the common rabble will be found in our chapters . . . and are we strong nationally? 'Tis a crime how strong we are . . . Yep, we've tried Lifebuoy and even that doesn't keep us from being strong . . . Are we the stuff on publications . . . Well, one publication, anyway . . . Were we the entertainers this year? . . . Yep, lots of house dances . . . Nope, we didn't care to mix with the rabble . . . Just us, and what congenial parties . . .

Tau Epsilon Phi

DOES OUR ALUMNI control this cluh? . . . We'll say it does, as does the chapter control the things on the campus that's well worth while . . . The Phi Eps . . . Well, profanity is forbidden . . . Are we the stuff socially? I'll say we are . . . Does our boy Kuniansky rate? . . . We'll say he does . . . What chance do the others have when we are on the campus? . . . after we bid the rejected go the other one . . . They didn't have enough to fill a column in the Technique . . . No foolin'.

Beta Kappa

WE ARE YOUNG on the Tech campus . . . With an established national reputation . . . we won't go into that, but it is established no doubt . . . Are the co-ops the cream of the crop? . . . We'll say they are; and do we get the pick of the cream? Well, after we skim them the other frats . . . take theirs . . . Are we smart? Look at the awards for scholarship . . . And do we go to church? Look at the standing we have . . . Socially, Bah . . . Well, we could rate, but we direct our talents along other wines . . . We are pretty good, we are . . .

Phi Kappa Sigma

WELL, WE ARE DUE for a comeback . . . well do we remember . . . well we can read the history, smartie . . . we were the stuff . . . it won't be long before we hit our stride and step to the front . . . Give us time . . . Rome wasn't made in a day . . . and we remember, thanks to records, when we were the stuff . . .

Pi Kappa Phi

EVEN THOUGH OUR MUSICIANS are gone, the melody lingers on . . . We remember when the activity at Tech was confined to our lodge . . . yes, lodge . . . You too Chi Phi and Psi Lodge . . . Our fraternity colors are the same as the school's . . . No, we are not Scotch, we have chapters in the better Atlanta schools . . . Three chapters here . . . and do we get together for socials? . . . Anyway, we have a good bunch of fellows, and we remember when . . .

Theta Chi

YEP, WE HAVE A CHAPTER on the Tech campus . . . Believe it or not . . . Proof will be furnished by writing the Grand Goblin . . . Enclose a self-addressed, stamped envelope . . . The large number of requests forces to make us do this.

(Continued on Page 8)

(Continued from Page 7)

Sigma Chi

DO WE HAVE THE BUTLER? . . . And did we have the house mother? . . . Yep . . . but the Kappa Sigs took her, the vipers . . . Now that we can study, there should be an increased improvement in scholarship . . . Speaking of campus leaders, we have 'em; it isn't every chapter that has its Fain and McEver . . . Now that Vallee has made the Maine Stein Song popular, the immortal strains of the Sweetheart of Sigma Chi are not heard as much . . . never you mind, we are going to put on a campaign to revive it . . . Remember Etting still yodels . . .

Phi Epsilon Pi

THEY HAVE A CHAPTER on the Tech campus . . . Sure, it is a national . . . Look in Banta's.

Inter-Fraternity Rumblings

'TIS MID-YEAR AGAIN . . . Bernie Cummins is signed . . . Swell band this Cummins and his boys have . . . There is a couple rubbing noses; oh well, it's an old South African custom . . . There is Syd Williams, the man responsible for the swell band . . . The fascinating lady is Miss Louisa Howard . . . The vice-president is busy on the door . . . Nope, he didn't stag; brought Betty Crandall . . . The popularity was short lived—one night, to be exact . . . The very handsome elderly man and woman . . . That's Dean Skiles and Mrs. Skiles . . . Yep, the Dean is our pal and attends all the better social affairs of the campus . . . Now 'tis commencement and time to get rid of the Seniors . . . Tal Henry has been signed by the Inter Frat boys . . . Rumblins, some like it, some don't; this goes to press before Mr. Henry makes his advent . . . So we can't say . . . Graft at the dances . . . Oh . . . That has been eliminated . . .

KNITTING CONTEST CALLED OFF.

Emory Accuses Unfair Tactics.

The annual contest in the art of knitting has been called off, it was learned today. A howl was sent up by Captain Percival Blots, the stalwart Captain, who has never looked better, than he did when groomed in the latest of orchid floss, a product of his own handiwork?

It isn't fair for the Agnes Scott team to institute boys' rules this year when they have never been so conducted before. Last year the girls won by a dropped stitch and a pearl two. Quitting winners, that's what it is, as the stalwart captain wiped a tear from his eye while relating the tragic epic in sports history we ducked—We'll take Vanilla—or cream puffs at ten paces every time.

WALNUT 6791

158 Central Avenue, S. W.

Gad! A May Queen

Shades of Emory, Vassar, and other schools of this speed. Pictured above is the scene of the very convenient place of the Ballot Box. And even this did not cause the audor of the voters to be dampened. The vote was a record making one with Queen Dean and King Max Feldman. The Riff Raffs controled the election. Even with guarded boxes and concealed voting places the ballots are contested, Gad!

Fencers and Foilers Organize

Not content with the many worthless honoraries on the campus the members of the fencing team have announced the founding of another of these so-called honor societies. Yep they will have meetings, a secret charm and will have an initiation fee. Which can be said about a majority of the honoraries on the campus. The more honoraries the less honor in any single one.

Thirty Fish Bite

Yep thirty of the social elite of the school bit in the recent Cotillion Club Election. This is a very exclusive club and we learn that they only bid men that they are sure of having the necessary kale or Do Ray Me. They have a dance each year, the fish paying and the older members taking a date to the Dinner. The new fish are forced to revive the club next year if they are to be so honored. Well here is a case of so-called perpetual motion. Who is going to be the last fish still remains to be seen.

For President—We Nominate

Elmer Whataman—One of the foremost campus leaders that already has the support of the Riff-Raffs, Co-ops, Fencing Team, Evening School of Applied Science, and what have you.

There is always a Platform to get in on, take the Street car for instance . . . Well Whataman announces his Platform . . . Of course as heretofore stated it is to get in on solely:

1. Heavy Wines and Lots of Beer.
2. No Morning Classes.
3. No Afternoon Classes.
4. Down with everything.

With the above line-up there is no doubt that he will be elected. Now, dean, go get another job . . . Scram.

Gross Injustice

Think of the last election. A gross injustice when a Frat brother was much better qualified. And we didn't have a chance to count the votes either.

PEACHTREE AND THIS exclusive girls' school Where Buttermilks and what have you are turned into Snub-Debbies with rapid speed. A charmed circle that are very snobbish about admitting rank outsiders. Have four very exclusive clubs. The Faculty says no but they say yes and there you are. They rate all of the dances no doubt, no dance is complete without them they are the stuff they are.

LOCATED A FEW MILES from the Liar of the Engineer is the Metropolis of Decatur with its beautiful homes and hospitable persons. Located in this large commonwealth is the school of Students. Yep students to the nth Degree . . . Few are popular with the College boys . . . The few that are are make shifts etc. . . . or in betweens in most cases . . . very few goodlookers for the number congregated . . . Of course there are plenty that are plenty smart . . . But who cares to waste time with a Phi Beta . . .

THE PLACE THAT the SYT or Debbie always suggests for just a drink and after she has finished eating the check looks like a telephone number . . . Located on the famed Peachtree Street where everybody wants to see who the fish the other Fillie is out with.

THE LABORATORY of Commerce and the General Science Student where most of the laborious work is done amid the surroundings of the Theatre of the Stars. And after the stage shows the Fox Gals must be entertained . . . And of course the Tech man is the man to do it.

AND THE PHRASE Buttermilk . . . What column would be complete without something that has to do with the phrase that Tech has made famous . . . Buttermilk to the common rabble is just a drink but to the Engineer Nay Nay it is much more than a liquid . . . It originated with the name for the pests that infest Grant Field and the Rosebowl . . . In the quest of Baseballs or anything that isn't nailed . . . From this it spread to their molls the female students of the O'Keefe Junior High . . . From this somewhat restricted meaning it went to a broader meaning and applies to anyone that isn't a SYT Debbie or Snub Debbie. Then there are the others that infest the fair city . . . First the SYT . . . The gal of fifteen or sixteen that attends the finishing school for young ladies on Peachtree St. From this stage they emerge to the Snub Deb Stage . . . where the snobbishness begins being embedded . . . After a year or so as this they enter the Famous Debbie Handicap . . . Pardon Horses, but

(Continued from Page 11)

the Debbies take liberties . . . For a year they look over the eligibles and try to pick a Golden Future . . . For the past few years the sledding has been rough and there are many of past years' clubs that have as till yet not culminated their man hunt.

Social life at Tech . . . Began with the entering of school of the freshmen . . . First they were entertained, dined, wined and womened by the various frats . . . After this came Pledge week and the blaze of glory ended and the Frosh had to pay and pay . . . After this a series of College Fraternity Dances . . . with the Chi Phis entertaining at the Lodge at a Tea dance after each of the football games . . . After this came the Mid-term dances with Bernie Cummins and his swell band . . . a good time was had by all . . . After this another series of Fraternity and Club dances . . . some good and some not so good . . . and then the climax is yet to come, the Commencement dances with Tal Henry furnishing the music . . . All in all . . . the year from a social standpoint despite the many disappointments has been an excellent one . . .

The higher ups on the campus . . . Have made new conquests, while some of them have stuck by thick and thin to the SYT's that they started with . . . The big Pan-Hellenic man went off at a tangent every once and a while and played around . . . however for the bigger and better events the importation was always the same . . . Cornell made many new conquests and seems to have weeded them to one or maybe two, an ace in the hole is always good . . . However the Bobbie Ace in the hand counts a lot . . . Then there was the feud between the two big editors . . . The editor of this book being the victor it seemed . . . and although to the victor the spoils it seems wasn't cared for a bit . . . Life is funny that way . . . all of the aces in the hole in this case . . . Then Turnbull went in for a diversified bunch and centered for a while on Agnes Scott . . . Vierrick seemed to fancy the F and M gals as did the track coach . . . The Art editor of this book . . . also changed seemingly several times and as till yet it is a no decision bout with a shade being in favor of the Agnes Scott May Queen; presence of the party seems to have a lot to do with things in many cases . . . Yours truly stuck to the gal in the Sunny land of Florida . . . remote control so to speak . . . we hope that it was control . . . at any rate . . . Then Storey seemed to become more and more intrenched in the realm of the SYT, yep the family even calls him Fred . . . Foxy seems to keep up a deversification and the Ten Fifty is very convenient . . . Iron Head Neblett has just played around so to speak . . . Rod Hale does not have a particular gal . . . well what particular gal would care for Rod . . . Then Sanders Camp went into the Ten Cents a Dance realm which was somewhat short lived . . . We think that the comment really helped this time . . . Conrad Bach carried his paint brush on his lip and no paint has touched this virgin brush at this writing . . . Whitfield up and got married and kept out of Print . . . Nahas palled with the Dean of Women at Agnes Scott . . . There is plenty of other happenings but this has to end somewhere . . . So until next year Okay Seniors . . .

Who Dealt . . . Pass . . . Did you rate the Boilermakers Ball . . . You don't mean it and Jack is so attentive lately too . . . Oh pardon me I am holding up the game, I pass . . . Do tell me about Charlie I think he is a love . . . They have the most gorgeous gowns at Allen's and reasonable too, only fifty dollars . . . Beg pardon I pass . . . You don't say and I thought his intentions were . . . serious . . . A little biased and pink . . . The Gammas are loves don't you think . . . Pardon me Dearie I pass . . . Seen Chester's new car . . . It is a dream . . . Well don't get huffed up Madge . . . you take your bridge too serious . . . I pass . . . Joe had a date with Sarah and she has a bruised arm this morning . . . you don't say Sarah is attractive . . . Alright I pass . . . Give me a cigarette Dearie I left mine out of my purse . . . I pass . . . Let's mayonnaise . . . I've never seen such rotten hands in all my life . . . And far into the evening making them late enough to make the date wait an hour . . . Moral . . . In this case it would not have been the best to have gone West Young Man go West and she was a Blonde too.

A WEDDING.

By A Shot Revolver.

The church was lighted and so were the guests. The old gent gave his daughter away while there were several in the audience that could have done a much better job of it. The preacher earned his two bucks and scrammed. A Big Blonde yodled Love songs—and a little runt played the big violin.

The Best Man kissed the bride, she was a bit colder to him than heretofore, sort of keeping the home fires burning as it were.

The Old man took in another boarder and welcomed him at a reception where Lizzie Blutz refused to eat Ice Cream with a Fork.

The Bride wore white and carried a gang of flowers.

(Continued on Page 15)

SPORT GLANCES

Football Player Throws Game.

The stands were crowded. Tech-Georgia and the championship at stake the third quarter and the score nothing to nothing. Two minutes to play and the ball at midfield. A play and the mighty Gallapoway has the ball looks like we will lose, a clear field he passes the coaches bench—and sits down. The whistle blows and the game is over, Score 0-0.

As the player passed the bench he asked for a raise it was revealed in an interview after the game. The coach it is said refused. The result being that Alumni are looking for a new coach.

Basket-ball Player Dies.

'Tis sad but true. The nobby new uniforms of the basket-ball team this year might make the feminine admirers' heart palpitate but they were tragic to one member of the squad. Just like red Flannels was the coaches' explanation immediately after the player was taken from the game in hysteries. Moral—Cotton from Georgia is best.

Basket-ball Game Called.

Due to the loss of the ball in the second inning, the annual Tech-Georgia game was called with the score ten to ten. A foul into the Buttermilk zone and bingo the ball was gone. When appealed to the athletic department stated that baseball was a losing sport and that in the depression budget that one ball had to be furnished by each team the Georgia Association, also cut the budget so close that a ball could not be secured . . . Tough these depressions.

Lacrosse Player Chews Off Opponent's Ear.

In a recent legalized murder fracas with Maryland, one of the players playfully chewed off another's ear. In reciprocation he broke the offender's leg. Nice game Lacrosse

Golf Team Feated.

Can you imagine a golf team without feet? Neither can we.

Swimming Team All Wet.

Gee, but the water is wet, was the exclamation of Captain Fain after a recent meet in Florida, a broken jaw was sustained also proving that the water was hard.

Fencing Team Ruffled.

The New Uniforms Elmer . . . The New Uniforms.

Tennis Team Ties Tennessee.

Tempting Tae, Tanalizing Tamalies Tomorrow, Tennis Tes Treakey.

Track Team Thrilled.

The members of the Tech Track team were thrilled this afternoon at the ability of their opponents. So much were they thrilled that they would walk carefully behind the sprinters admiring their excellent form . . . Yep the meet was with Vassar.

EQUIPPED---

with many years' experience for making Photographs of all sorts, desirable for illustrating College Annuals. Best obtainable artists, workmanship, and the capacity for prompt and unequalled service.

(Continued from Page 13)

The Groom was handsomely attired in a suit cunningly tailored of Black broadcloth, tapered here and there, he was a striking figure (Struck as a plumber). His buttonierre was of Gardenia. His handsome, manly shoulders were a picture of Manhood.

The Bridesmaids wore different colored Dresses and had some flowers, too.

The Groomsmen were handsomely attired, and behaved perfectly. The count of the Wedding Presents after the guests had departed were 10 to 1 in favor of the Guests.

CLASSIFIED SECTION.

Stolen.

About twelve-thirty Sunday night from Street back of Rosebowl Ford Sedan, Motor No. 0000000. Can identify same with cushion that fits rear seat —Reward—Phone Jerry Woods Delta House.

Lost.

Near Chemical Department, Quart flask containing Alcohol, return Flask to Dean of Chemistry Dept.—No Questions Asked—Oh Yeah!

Twenty Dollar bill on campus, can identify by signature of Andrew Mellon in lower right hand corner. Reward 50c.

Drag with Debbies—Call any Fi Delta Theater.

Complete set of X E reports dated 1927 and signed Theodore Bots—Reward—Bill Phillips—He 1111.

Snap-Shot near Tech Campus—Handsome reward offered—Mrs. Theodore Blots—Biltmore Hotel.

NOTICES.

From this date hence we will not be responsible for any Debts contracted by Bobbie Jones, Rudy Valee or Herbie Kay—Sigma Alpha Epsilon.

Help Wanted.

Tanks by Standard Oil Company, College Graduates only. If you can't hold your own don't apply. Kappa Alphas and Sigma Nu's taken without examination—State Capacity in first letter.

Exchange.

Tuxedo, Pocket Flask, and Golf Clubs for set of EE reports graded B or better—Apply The Phi Gamma Delta House.

Tenor Saxophone, case, and two Clarinets for three months' board in desirable location near Tech —Apply Plumb Co-op House.

FLATFEET RAID DICK'S JOINT.

Faculty Members Found In Dirty Dive.

Good old Dick, he was good while he lasted. But while trying to find another joint a Flatfoot stumbled into his alley . . . and alas; Poor Dick's place was raided. And did the Flatfeet gloat because not only did they find Joe but they found a room of Tech men . . . and did they Smirk . . .

"We knew we would get you for not letting us in at the football game," one scouled and threw a chair, felling Professor Strongarm . . .

Dean Squires remained silent and offered an adjustment, in as much as he termed it he and a group of the boys were merely having some innocent fun . . .

"Fun, eh?" smirked the cop. "Offer us a bribe? Remember the student that you expelled for this."

In all of his best modesty the Dean answered that he did.

"Well, I'm de guy dat you expelled." At this the spring dance was whistled to the Dean after a clout from the Coppers Club.

"Now Young Gentlemen," said Doctor Rittman, "Let's don't be too hasty about this."

Que voulez-vous encore?

No, we haven't forsaken our good old American language (off with your hats—the flag is passing by). We are merely using an approved technique to lure you into reading this advertisement. Don't leave the room, please. You'll thank us for it before we're through. Yes, Corona Coronas will be all right if you simply *must* express your gratitude that way.

But to return to our subject. What more *could* you wish in a motor car than all that the new Chevrolet Six provides? You have doubtless thrilled already to the smartness of Chevrolet's long streamlines and spacious Fisher bodies. If you want speed, the new Chevrolet touches 65 to 70 miles an hour, with six-cylinder ease, quietness and smoothness. If you yearn for power—well, 60 horsepower is more than adequate for any demand you are likely to make. Marvelous handling ease is assured by combining the easy, quiet Syncro-Mesh gear-shift with Free Wheeling. And, any owner will tell you that Chevrolet operating and upkeep economy is unexcelled.

Does that strike a responsive cord, or are you just an old cynic? If you are, we suggest a *ride* in the new Chevrolet Six. Once you take one, you'll agree with every point we've made. And you'll agree, too, that the best place to be these fine spring days is at the wheel of this smart, fast, and *remarkably inexpensive* automobile.

Twenty beautiful new models, at prices ranging from **$475** *to* **$660**

All prices f. o. b. Flint, Mich. Special equipment extra. Low delivered prices and easy G. M. A. C. terms. Chevrolet Motor Company, Detroit, Michigan. Division of General Motors.

"Hasty, eh? You make me laugh. Remember the Boid that tried to sell you two tickets to the Policemans ball?"

"I can't say that I do," was the prompt reply. And then the lights went out as far as the Doctor was concerned . . .

Lying Horizontally in one corner were "Hells Bells" Dooling, "Shilock" Houstuon and "Boucket" Fields with a glass of cider (Oh Yeah) in their hands, two Mols were fanning them with Brick Bats and massaging their brow with Carbolic acid.

"Whose them mugs?" inquired the Officer lamping the two Professors.

"Thems the Guys what brung us," replied the Mols . . .

"Scram," replied the Coppers. "Back to the Seminary with youse."

Imagine the surprise of the Professors the next morning when they found that the raid was a College Prank played by fun-loving school boys in the guise of coppers. Now, Faculty, let that be a lesson to you.
